EFDA/ Radiology Testing Information

These are two separate certificates. Students will be tested on each separately. There will be a written test given for EFDA and Radiology. The clinical portions are as follows. Each student must score a minimum of 75% for each to pass.

EFDA Clinical:

- Polishing of amalgams and composites
- Upper and lower alginate impressions/ Pouring models
- Placement of topical anesthetic
- Placement of periodontal dressing
- Placement of retraction cord
- Placement of pit and fissure sealants
- Placement and removal of matrices
- Placement and removal of rubber dam
- Fabrication of temporary crowns
- Cementation of temporary crowns
- Placement of Bases/ Liners (IRM sedative filling)
- Suture Removal
- Clinical Charting
- Coronal Polishing

Radiology Clinical:

- Complete FMX (16 films, on digital equipment)
- Pano

The clinical scores are combined with the written for a final score, that must average a minimum of 75%.
